

The 250 000th Case 430 series 3 skid steer loader has just come off the production line.

“In 2000, the 100 000th skid steer was manufactured and ten years later, Case has more than doubled global sales,” says Rod Watson divisional director of CSE Equipment’s construction division. “All terrain Case 430 series 3 skid steer loaders have been designed for exceptional driving force. Turbocharged, four cylinders, Tier 3 certified diesel engines, which provide the power and torque required to efficiently cope in the toughest site conditions, also ensure operating efficiency and fuel economy. High torque power ratings provide sufficient rim pull to keep the machine moving and recovering in arduous environments.”

These versatile skid steers have more than 75 attachments for efficient digging, hauling, pushing and loading material on job sites in diverse industries, including mining, construction, cement, steel, agriculture and landscaping.

Optional attachments like buckets, pallet forks, breakers, augers, sweepers, backhoes, stump grinders, cement mixers, cold planers, trenchers, rollers and slot cutters are available.

Case construction equipment, available exclusively from CSE Equipment Company in Southern Africa, includes loaders, backhoe loaders, excavators, telescopic handlers and skid steers.
