

Greens King® IV Plus

For nearly forty years the name Greens King has been synonymous with quality, reliability and simplicity. Although the legendary mower hasn't changed a great deal, since its introduction in 1968, it hasn't needed to. Its simple design makes it incredibly easy to maintain and its Jacobsen cylinders provide a superior quality of cut every time.

A walk-through operator platform allows for easy access from both sides. The intuitive layout of levers and pedals provide simple and easy operation. Free-floating, steerable cutting heads move independently of the tractor. The individual cylinder control allows operators to mow with any one cylinder or a combination of units, minimising tracking. Attachments include vertical mowers, spikers, brushes, rollers and groomers.
