

WideSpin™ 1530 Series | The #1 Spinner Topdresser in Golf.

The WideSpin 1530 is the result of combining Turfco's® 45+ years of topdressing experience with direct input from golf maintenance professionals around the world. Today's demanding topdressing programs require a topdresser that delivers total control over your material...from frequent, light topdressing to heavy applications at unprecedented widths. Its outstanding performance has made the WideSpin 1530 the industry's choice for thatch management, smoothing greens and modifying soil composition. And to ensure you get the most from the WideSpin 1530, Turfco offers an unrivaled three-year warranty—the same service plan you've counted on for 15 years.

The WideSpin 1530 is perfect for today's new bentgrass and bermudagrass varieties that require a much higher level of frequent and precise topdressing to control thatch. And the WideSpin 1530 is specifically designed to provide a light, frequent topdressing program that is important to maintaining a true and smooth putting surface. Independent belt and spinner speed, adjustable spinner angle and a metering gate give you precise control. With the WideSpin 1530, you get a consistent, quality application combined with the time-proven reliability of Turfco equipment. You will quickly accomplish your program goals with the least amount of disruption to your players. The WideSpin 1530 is available in three models to best meet your specific needs: Tow-Behind, Truck-Mounted and Tow-Behind No Engine/Hydraulically Driven.

- Topdresses so light that it requires no dragging.
- 30 ft wide light application allows you to topdress 18 greens in 90 minutes.
- 15 ft heavy application allows you to topdress tees and aerated greens.
- Easily switch from a light spread to a heavy spread in five minutes without attachments.
- Spinner angle is adjustable from 0-15° for greater control and better penetration of turf, even on windy days.

■ Galvanized hopper for worry-free, rust proof durability—no paint to get sanded away.

■ Patented three-position switch guarantees spinners turn on before conveyor, ensuring a clean application every time.

Frequent, light topdressing of 18 greens in 90 minutes.

Heavy spread applications up to 15'.

Accessories

Trench Filler Attachment

A trench filler attachment gives the WideSpin 1530 even more uses—and saves time and labor. Prod. No. 86150

Cross-Conveyor Attachment

Expand your 1530's usefulness by allowing it to be used for material handling duties. Quickly and easily attach without tools. Use to top off bunkers, add mulch to flowerbeds, level and repack sprinkler heads and more. Prod. No. 86172
